

## Do you use community gynaecology services?

By this we mean long-standing non-urgent gynaecological problems such as heavy and/or painful periods and pelvic pain; ovarian cysts; uterine fibroids and polyps.

### What can you do to help?

If you live in Elmbridge (West), Runnymede, Spelthorne and Woking, we need your help. Please tell us what you think of the current service.

### Why is your view important?

We want to make sure the services we provide are tailored to the local population's needs. The only way to really understand whether the services are good, or what we can do to improve it, is through the valuable feedback from people like you.

#### Complete an online survey

[www.surveymonkey.co.uk/r/GYN1](http://www.surveymonkey.co.uk/r/GYN1)

#### Meet us for coffee

Talk to us and share your experiences and views with other women in Surrey. We want to make sure we meet the needs of local women. **Your opinion matters.**
